Office Action Summary

Application No.

10/798,342

Applicant(s)

MERRIMAN ET AL.

Examiner

Ronald Laneau

Art Unit

3627

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-22 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

1. Claims 1-22 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-15 and 19-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Wexler (US 5,960,409).

As per claims 1-5, 9, Wexler teaches a method for advertising, comprising: receiving an advertisement request from a user node, wherein said advertisement request is based upon a link sent from an affiliate node to said user node in response to a content request sent from said user node to said affiliate node (col. 4, lines 54-57 and col. 5, lines 1-8); and selecting, in response to said advertisement request, an advertisement based upon stored information about said user node (col. 4, lines 61-67), the network consists of a plurality of nodes, wherein a user a first node (user node) views a first quantity of information provided by a second node (publisher) for the benefit of a fourth node (advertiser) (col. 6, lines 15-19).

As per claim 6, the system of Wexler inherently teaches a system wherein the stored information includes at least one of the network address of said user node, the

Art Unit: 3627

domain type of said user node, the time zone of said user node, the geographical location of said user node, and an industry code for statistical purposes or satisfaction index calculation as claimed.

As per claim 7, Wexler teaches a system wherein said stored information includes the number of times an advertisement has been sent to said user node (col. 5, lines 26-29).

As per claim 8, Wexler teaches a system wherein selecting an advertisement is further based upon at least one of a browser type, a browser version, an operating system type, and a proxy server, each associated with said user node (col. 3, lines 29-31).

As per claims 9-14, Wexler teaches a system wherein if selection criteria associated with more than one advertisement are satisfied based upon said stored information, then calculating a satisfaction index for each advertisement, and selecting the advertisement with the lowest satisfaction index, wherein said satisfaction index for an advertisement is directly proportional to the number of times said advertisement is sent to a user node, wherein said satisfaction index for an advertisement is inversely proportional to the amount of time expired since said advertisement was first permitted to be sent to a user node, wherein said satisfaction index for an advertisement is inversely proportional to the maximum number of times the advertisement is permitted to be sent to a user node, wherein said satisfaction index for an advertisement is directly proportional to the total amount of time over which said advertisement is permitted to be sent (tallying clicks and generating statistics for multiple banner publishing site and multiple advertisers are equivalent to the satisfaction index calculation as claimed) (col. 5, lines 32-44).

Art Unit: 3627

As per claim 15, Wexler inherently teaches an advertisement request that would include an Internet Protocol address associated with a user node as claimed.

As per claim 19, Wexler teaches a system further comprising sending said selected advertisement to said user node for display (col. 5, lines 29-31).

As per claims 20-22, Wexler teaches a system comprising receiving from said user node a click through request for information about the advertiser associated with said selected advertisement, further comprising sending a network address for said advertiser to said user node in response to said click-through request, wherein said stored information includes information about a prior click-through request received from said user node (col. 3, line 65 to col. 4, lines 9, see abstract).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wexler (US 5,960,409).

As per claims 16-18, Wexler does not teach a system performing a reverse domain lookup table based upon an internet protocol address, selecting an advertisement based upon the results of said reverse domain and perform a trace operation route but it would have been obvious to one of ordinary skill in the art at the time the invention was

Art Unit: 3627

made to utilize a lookup table as claimed because it would increase flexibility of the system since arbitrary functions can be realized with lookup tables, the Official notice is taken as such.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- McGuire et al (US 2003/0023489) teach a method and system for providing network based target advertising.
 - Judson (US 5,572,643) teaches a web browser with dynamic display of information objects during linking.
 - Wade (US 2002/0019831) teaches methods and systems and presentations for delivery over the Internet.
 - Greenwald et al (US 6,757,662) teach a method and system for triggering an advertisement for display via a computer network.
 - Swix et al (US 6,718,551) teach method and system for providing targeted advertisements over a network media delivery system.
 - Minte (US 2002/0046118) teaches a method of linking advertisements on the world wide web with advertisements in other media.
 - Miyazaki et al (US 2002/0013785) teach an internet advertisement system which utilizes an advertisement server site and at least one partner web site.
-

Art Unit: 3627

- Merriman et al (US 2002/0099600) teach a computer system for automatic replacement of direct advertisements in scarce media including an advertising server for selecting a direct advertisement based on certain criteria.
- Cantrell (US 2002/0103698) teaches a system and method for enabling user control of online advertising campaigns.
- Hite et al (US 6,002,393) teach a system and method for delivering targeted advertisements to consumers using direct commands.
- Reilly et al (US 5,740,549) teach information and advertising distribution system wherein a data server stores and updates a database of information items and advertisements.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald Laneau whose telephone number is (703) 305-3973. The examiner can normally be reached on Mon-Fri from 8:30am - 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Olszewski can be reached on (703) 308-5183. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
